At the former there will be a drill and after luncheon the visiting gentlemen will be the prests of honor at the steer tying and bronco busting contest, to be held at the Phoenix park at 2.30 bronco busting there will be an exid bition of indian archery and foot rac ing, given by the Pima and Maricopa

#### WORTHY MEASURE. Conneilman Hurns' till anthoriving

sheriffs to make quarterly inspection of all places where liquors are solo o gambling is carried on has passed the council after due consideration by that body, and is now pending in the house. This measure is designed to remedy a condition of things which as they now stand, is little less than deplorable. Its primary object is to regulate the hundreds of isolated can beens and gambling joints new in op eration in the grazing districts, which turned from the Kelly mining district are generally run without license. without contributing one cent to the school funds, an other similar con- district. He states that the Cavern cerns are required to do by law, and mine concentrator started up recently which are chiefly responsible for a under most favorable circumgrent deal of crime which involves stances, and that the Graphic Mine cowboy and the herder. Out on western edge of the territory, introduced the other day by Manager from the Mexican line norm to Colorado, and particularly along the bor "Everything looks bright," says der of the Navajo reserve, scores of Bonsall, "for the Kelly district, these joints are in operation. The a number of the mines are producing law prohibiting the sale of into icants good paying metals." to Indiana and minors is here violated in the most open and shameful manner, and all manner of sumbling is carried on among cowboys, Indians and sheepherders. The men and boys in charge of live stock fill themselves with the "sheep dip" sold in such places under the guine of whiskey, and, bereft of all reason, steal cattle or sheep from the herds and docks of employers and gamble them away. A case in point occurred in western Rio Arriba county only a few days ago, when a herder working for Reyes Gonzales, of Abiquia, west on a debunch at one of these joints and gambled off 200 head of Mr. Gonzales' sheep. At preciat only the grand jury can investigate and bring to instice those who conduct such places. This is too slow a process, as during the long interval when the grand bury is not in scusion these fellows can openly violate the law, rob right and left at gambling and clear out to Arigona or Colorado by the time the grand jury is ready to attend to their cases. The remody therefore, lies in requiring the sheriffs to make quarterly inspection of all such places, and having them report the result of their findings, whether or not the Hquor and caming faws are being 100 100 200

# PROPOSED GAME LAW.

As amended and passed in the house Wednesday forences, Mr. As-carate's bill to amend the game law. as set forth in section 1, chapter 51, session acts of 1899, provides that it. shall be unlawful to kill any quail. prairie chicken, partridge or wild tur-key, or to kill, wound, etc., any antelope, deer, etc or mountain sheep, exnals being with horns, may be of September, October and November In the of each year in the countries of Rio Arrion. San Jose, Taos Coffax, sian Miguel, Guadatupe and Santa Fo, and during the months of October, November and Incomper in and provided, further, that said birds may be killed with a gun in the months of January and selectory provided, further, but no pheasant the passage of this act, and that no pursuishguil briggists Pricedo portotila.

Heretofore lawyers in New Mexico have been compelled to presen their briefs to the courts with citations printed in Roman, when it is pre-ferred that italics should be used; but since The Citizen machine has been put in operation italies can again be used. This is one of the many new improvements over old style machines.

FLEMING'S THOROUGHNESS. When Inspector He Compelled Operators to Observe the Rules.

A te ribie accident occured re cently in the ash Peak mine in Arizona, just across the new Mexico boundary, caused by the explosion of powder in the mine.

In ... is connection some....ng can be learned of how expert authorities consider this matter from the report of the New Mexico inspector of mines, J. W. Fleming, as reported on page 280 of Governor Otero's annual report. On May 2 last, while at Gullup, in-spector Fleming heard that powder was stored in the W. A. Clark mine at Clarkville. He considered the matter so serious that he did not wait to go to Clarkvine, but immediately telegraphen the superintendent of the mine, asking him if the report was true, and if tru cordering him to remove the powder at once. The su perintendent repued that the powder was kept in a magazine, and enough taken into the mine for daily delivery, and asked if that was conaidered dangerous. Inspector Fleming telegraphed:

consider it dangerous to have any powder stored in a mine, and nave it removed as soon as possible." ...e powder was immediately re-

RIGHT OF ORGANIZATION.

Same Rights Should Be Accorded Workingmen as Capitalists. Yesterday evening a party of gen a brief but concise statement of the troubles existing between the miners and their employes in the Carbon city The party included William Howell Workers of America, and President George Golightly and Officer George Evans of Gallup lodge No. 1,647. They stated that it was currently reported that the strike was at an end, and in behalf of the miners the gentlemen wished to say that, so far as the miners were concerned, there never was a strike, but there was as attack on Gallup miners by the Col orado Fuel and Iron company in the shape of a lockout, because their miners saw fit to join the United Mine Workers of America, an organization onstructed from shear force of ne essity, and because the Colorado Puel and Iron company moved with the spirit of the age by organizing itself into a big money-making comheir coadjutors in the money-making iness, which are the coal miners on account of lack of funds. The dif-ficulty appears to have been over-come, as the library has today been stated that the coal miners have never questioned the company's right to combine for economic purposes with a view to bettering their con-ditions, but the miners do question their right to say to us that we minera) shall not combine for the betterment of our conditions. As a chuttal to this they say they do not eny us the right to combine, but that they have a right to deal with whom they please. This we concede. Then

why should they edject to u sgoing on with our business of organizing our craft, so that we can say what should be the first coat of production in coal mining? We pay our own money for it, and we, the miners of the United States, have returned to distribution through increased wages by organization over \$19,000,000 for the year 1909. The western miners nor the people got any of that; but the Colorado Fuel an. Iron company did, and got rich in about six years. Six years ago they were close to the ground, so much so that they could not meet their wage obligations for as high as three and four months at a time The miners stood the matter with them without scarcely uttering a murmur, and now that the conditions have changed we comeforward and ask that we be allowed a small recognition in the side of prosperity that has been passing over our country.

They, by their actions, say no, as they desire to pile up more millions, cost what it will. The miners only
